Objective

To be hired by you and work in the St. Louis area so that I can use my skills that I have acquired in the classroom over the past four years along with the skills I have obtained from my personal passion of programming, math, and language and be paid for it.

Why You Should Hire Me

While my interest for math and language goes back to high school, my passion for programming only started two years ago. I am highly focused, motivated, and learn quickly through instruction or independently. I will be a very positive asset to your company.
